DETAILED ACTION

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 1 and 4 are objected to because of the following informalities: In claim 4, line 2, change "the" before "P-type zone" to --a--. In claim 1, line 13, the word "possible" is not a positive limitation but only requires the ability to so perform. Also, the term "the possible current paths" lacks proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, lines 12-14, the phraseology "biasing means setting, when the switch is open, the output of the differential amplifier so that the possible current paths through the power amplifier between the deflection coil and the first terminal are cut" is unclear and confusing. The term "biasing means setting" appears to be a step (in a method claim). Did applicant mean to say -biasing means for setting-? In addition, the term "possible current paths" is vague and the examiner's position is that Applicant should employ either high-side current paths or low-side current paths, as appropriate. Applicant is required to clarify these matters.

Claims 2-6 are rejected by virtue of their dependencies on the independent claim 1.

Allowable Subject Matter

Claims 1-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to disclose "biasing means (for) setting, when the switch is open, the output of the differential amplifier so that the possible current paths through the power amplifier between the deflection coil and the first terminal are cut" (claim 1).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Allender, Patent No. 6,239,561; Holmes et al., Patent No. 3,628,083; Lucas et al., Patent No. 5,170,132 ; Inoue et al., Patent No. 4,617,591 ; Spencer, Jr., Patent No. 3,816,792.
